Bachelor's B.Sc, Information Science, 3.7/4.0

Thesis: *'Compliance Challenges with Personal Data Protection Laws in Big Data-Driven Fintech'*

Amman, Jordan

March 2025

International Educational College (IEC)

IGCSE program, Scientific

Amman, Jordan

June 2020

Experience

Datahub Analytics

Business Intelligence Engineer

Amman, Jordan

March 2025 – Current

- **Project lead - Arab Bank Bahrain:** Led the end-to-end migration of regulatory finance reports for the Central Bank of Bahrain, automating manual Excel workflows using SSAS Tabular models and SSRS-generated Excel reports, **reducing manual effort by 90% and significantly improving reporting accuracy**
- **Dashboard Design:** Power BI and Figma dashboard POCs for major clients such as such as Jordanian Customs and Dammam Airports Company, allowing stakeholders to explore their options as if using the final dashboard.

Datahub Analytics

Trainee

Amman, Jordan

Jul 2024 – March 2025

- 8-month internship with exposure to Business Intelligence, Data Engineering, Business Analysis, and Quality Assurance
- Built strong skill of translating client business needs into clear KPIs for reporting and dashboard development with industry-standard tools including Power BI, Tableau Server, SSMS, and PL/SQL
- Contributed to the **Arab Bank GRC Project**, migrating reports from IBM Netezza to an Oracle backend and Tableau Server
- Optimized SQL queries for ETL workflows using PL/SQL, improving data refresh performance by up to 30%

Leadership & Activities

Al Hussein Technical University

Team Lead – AI Hackathon Winner

March 2024 – Oct 2024

- Led my team to build an AI-driven transportation solution that matches female university students with similar routes, providing a safer and more affordable commuting option.
- Developed a machine learning model using K-means clustering to optimize driver–customer matching
- Managed task allocation and delivered the final pitch to investors and city officials.
